OPERATION GUIDE

This product is a multi-functional LED lantern with a 4400mAh built-in lithium-ion battery which can be charged by a micro USB cable (the USB charging cable is included, the adapter is not included).

1. Please check the product carefully prior to usage.
2. Press the power switch to turn on the lamp or to choose the lighting modes.
3. Press the power switch in turn to adjust between the five modes: " 6500K/3000K/5000K/flash/off ",

Once select the modes after 30s, press the power switch again to directly turn off. long press the power switch to enter dimming, and the lantern has no memory function.

4. Use the included micro USB cable and a suitable USB charger to recharge the battery. The power switch will shine red light during charging and will change to green as soon as the charging is complete;
5. The max input voltage/current is DC 5V/2A, please choose a proper adaptor.

Note: USB-PD fast charging not supported.

Modes	Brightness	Endurance
6500K	750lm	6H
3000K	350lm	8H
5000K	1000lm	6H
Flash	1000lm	//

*The endurance in high-brightness mode is relatively low, if you need to get a longer endurance , you can lower the brightness.

NOTE

1. Please recharge the light prior to usage if it has not been used for a long time.
2. Do not let the battery fully discharge and avoid overcharging in order to keep the battery in good condition.
3. To avoid any damage to the lantern, please do not use any chemical solvents during the routine maintenance.

This product contains batteries. Do not expose it to extreme temperatures and do not attempt to modify or to disassemble the product. Replaced by a professional and should be disposed of properly.
